ISSUE: S204-06 - NEW TOOLING FOR DEALERS

This Technical Bulletin has been issued to inform Dealers that two Workshop tools have been approved by Methods and Techniques and are now available for use.

ACTION

The following gives an explanation as to why the new tools have been released:

NOTE: The following tools are mandatory items.

The crankshaft button tool is used in the end of the V6 crankshaft when using the seal removal tool and three-leg puller to remove the crankshaft damper.

NOTE: The crankshaft button tool should also be used when the three-leg puller is being used to remove the steering wheel (S-TYPE only).

The crankshaft front seal removal tool has been revised, and replaces the existing crankshaft front seal removal tool 303-409.
