TECHNICAL BULLETIN		
Subject JTIS8 – ELECTRICAL GUIDES AND DIAGNOSTIC TROUBLE CODE (DTC) SUMMARIES	Model Year VIN	All All

ISSUE:

JTIS8 - Electrical Guides and Diagnostic Trouble Code (DTC) Summaries added.

Make sure JTIS8 is installed. Access the additional information from JTIS by following the instructions contained within this bulletin.

Electrical Guides and Diagnostic Trouble Code (DTC) Summaries are now accessible from JTIS. (DTC Summaries provide a convenient way of quickly finding information associated with a specific DTC; refer to page 4 of this bulletin).

Note: The electronic versions of the publications are not intended to replace the hard copies distributed via the normal channels.

Adobe® Acrobat Reader

(Adobe® Acrobat is a registered trademark of Adobe Systems Incorporated).

Acrobat Reader is viewing software for the electronic publications and functions independently from JTIS.

Navigation through documents can be achieved using the toolbar:

Position the mouse pointer over a button to reveal the function the button performs.

Some toolbar features are available by right-clicking the mouse. **Tip:** Position the *Hand-tool* within the document area and right-click the mouse. Choose Back to go to the previous view.

The *Find* facility, when activated, allows the user to search for text anywhere within the document. The next occurrence of the same text can be located by pressing simultaneously *Ctrl* and *G* on the keyboard. **Tip:** Use the *Find* facility as an aid to diagnosis by searching for specific DTCs and then following the guidance provided.

The *Zoom* facility is useful for viewing all documents. **Tip:** Select the *Zoom* tool then hold the left mouse button down and drag the dotted line around the area to be magnified. Holding the *Ctrl* key toggles the *Zoom* facility and reverses the magnification.

Further assistance, if required, is available from an Online Guide, accessible by selecting the *Help* button on the Acrobat Reader menu.

Electrical Guides

To access the Electrical Guides from JTIS, click on the launch button:

Launch button -
Electrical Guide

The **Select Electrical Guide** dialogue box shown appears:

Click on a model year.
Click on a vehicle.
Click on the *OK* button.

Adobe Acrobat Reader is immediately initialized in a separate window and does **NOT** affect the functionality of JTIS. Toggle between the JTIS window and the Acrobat window in the normal manner, or resize them for simultaneous viewing.

The Electrical Guides are stand-alone publications that include full User Instructions.

Note: Security information has been deliberately omitted from the JTIS version but will be available via Jaguar On-line Communications (JCOL) when the launch programme commences in September 1999; see correspondence reference: JCOL–L–01 dated 08/99.

The JTIS version of the guides have improved usability compared with the paper copies, in the form of page hyper-links. Clicking on the *Fig. Numbers* to be found at the top right-hand side of the circuit diagrams, opens the associated data page. Navigation back from the data page to the circuit diagram can be achieved in a similar manner.

DTC Summaries

To access the DTC Summaries from JTIS, click on the launch button:

Launch button -
DTC Summaries

Adobe Acrobat Reader is immediately initialized in a separate window and does **NOT** affect the functionality of JTIS. Toggle between the JTIS window and the Acrobat window in the normal manner, or resize them for simultaneous viewing.

The DTC Summary is a stand-alone publication intended to be used in conjunction with PDU and the Electrical Guides. The JTIS version of the DTC Summaries have improved usability compared with the paper copies, in the form of page hyper-links. Select the vehicle range by clicking on the appropriate button:

A page containing the following table will appear:

Information about the extracted DTC can be located in the appropriate summary by working through the table:

- The letter preceding the *Code* indicates the vehicle *System(s)* to which the code relates.
- Open the *Summary applicable* by clicking over the text that describes the vehicle under diagnosis.
- Use the Acrobat *Find* facility to search for occurrences of the required code.

Note: More than one summary may need to be checked; for example, where a 'P' code has been extracted, the code may not appear under the first summary that is checked. The code will only be found under one system so check each system summary until the code is located.
