

# TECHNICAL BULLETIN

S419-11

03/2002

## Subject

**FACTORY PRE-PROGRAMMING OF THE REMOTE IGNITION KEY FOB TO MEMORY POSITION 1**

**Model: S-TYPE**

**Year: 2002.25 Onwards**

**VIN M45255 Onwards**

**Section: 419**

**Electronic Feature Group**

## Summary

S419-11: This Technical Bulletin has been issued to inform the Dealer Network of the introduction of a factory pre-programmed ignition key fob to memory position 1.

## Action

At the introduction of S-TYPE (facelift 2002.25MY) VIN M45255, changes to the method of supplying the remote locking key fob will be introduced.

Currently, all remote locking fobs are not set to a memory position and the Dealer network must explain the programming process to owners at the point of handover. To aid this process, from VIN M45255, all S-TYPE vehicles will be delivered with one ignition key remote fob pre-programmed to memory position 1. An electrical tie strap attached to the plastic bag holding the ignition key identifies the pre-programmed remote key fob.
